Noida, Uttar Pradesh

PROFESSIONAL SUMMARY

Aspiring AI/ML Developer skilled in Python, SQL, and FastAPI, with hands-on experience across the model lifecycle - dataset collection, model development, and fine-tuning/training using YOLO, OpenCV, and RF-DETR. Experienced in building GenAI applications with LLMs, RAG pipelines, and LangChain, alongside strong data analysis using NumPy, Pandas, and Scikit-learn. Analytical, detail-oriented, and driven to build practical, data-backed AI solutions.

TECHNICAL SKILLS

AI / ML / GenAI: LLM, Generative AI (GenAI), RAG (Retrieval-Augmented Generation), LangChain, Model Development, Model Training & Fine-Tuning, YOLO, OpenCV, Machine Learning, Deep Learning basics

Data Science: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, Data Visualization, Data Analysis

Backend & Database: Python, FastAPI, MySQL, SQL, Database Management, CRUD Operations

Frontend: HTML5, CSS3, JavaScript, React.js, Tailwind CSS, Bootstrap

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Roboflow

PROJECTS

AI-Powered Smart Meeting Summarizer | Python, FastAPI, MySQL, NLP, LLM, LangChain, RAG

- Built an AI-driven application for real-time speech transcription and automated meeting summarization, improving meeting documentation and information retrieval efficiency.
- Integrated LLM and RAG-based retrieval using LangChain to enable context-aware querying of past meeting notes and summaries.

Mobile Usage Detection System | Python, YOLO, OpenCV, Custom Dataset

- Developed a real-time object detection system to identify mobile phone usage by training a custom YOLO model on a self-collected, annotated dataset, covering data collection through evaluation.

Exam Hall Cheating Detection System | Python, YOLO, OpenCV, Computer Vision

- Built a computer vision surveillance system using a fine-tuned YOLO model to detect suspicious exam-hall behavior, such as unauthorized device usage, from live camera feeds in real time.

EXPERIENCE

Data Science Intern

Ibotix.ai | Jun 2026 - Present

- Collecting and annotating custom datasets using Roboflow for computer vision and object detection tasks.
- Training and fine-tuning detection models, including YOLO and RF-DETR, for real-world use cases.
- Working on model development, evaluation, and optimization to improve accuracy and production readiness.
- Exploring Generative AI, LLMs, and RAG-based approaches to build intelligent, data-driven applications.

Python Full Stack with Data Science Intern

QSpiders | Dec 2025 - Jun 2026

- Working on Python full-stack development, Data Science, SQL, and real-world project implementation.

IT Intern

Indian Oil Corporation Limited | Jul 2025 - Aug 2025

- Gained exposure to industry processes, software systems, and practical technology applications.

Python with AI Intern

Solitaire Infosys | Jun 2024 - Aug 2024

- Worked on Python programming, AI/ML concepts, and data analysis projects.

Web Development Intern

YHills | Jan 2023 - Mar 2023

- Developed responsive web pages using HTML, CSS, JavaScript, and frontend development concepts.

EDUCATION

- B.Tech in Computer Science Engineering | BPSMV, Sonipat | Aug 2022 - May 2026
- Class XII | J.P.D.A.V Public School | Apr 2021 - Apr 2022 • Class X | J.P.D.A.V Public School | Apr 2019 - Apr 2020

ACHIEVEMENTS

Best Intern Award - Solitaire Infosys • 2x Hackathon Winner - University of Delhi (DU)

CERTIFICATIONS

Python for Data Science & AI (IBM) • Artificial Intelligence (Novitech R&D) • Data Analytics (Novitech R&D) • Emerging Trends in Artificial Intelligence • HTML & CSS Basics (OpenWeaver) • Digital Productivity (NIIT)

STRENGTHS

Strong Problem-Solving & Analytical Thinking • Quick Learner and Adaptable • Team Collaboration & Communication
